3. Claims 1, 4-7 & 15-20 are allowed.
4. prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
 - a. Matsueda U.S. Patent No. 5,173,792 discloses the pixel structure comprising the compensative redundancy means with multi-channels.
 - b. Fukunishi U.S. Patent Application Publication No. 2001/0052889 discloses the pixel structure comprising the connecting portion of conducting layer with multi-channels and the contact holes formed on the coupling portion and the common line.

 - a conducting layer, located on said gate insulating layer, said conducting layer including a coupling portion and a connecting portion, said coupling portion

being above said common line for a top electrode of said pixel storage capacitor, said connecting portion comprising a first portion, a second portion and the third portion, wherein said first portion is coupled to said coupling portion, said second portion is connected to said switching device and said third portion located between said first portion and said second portion possesses a plurality of channels;

- a contact window, disposed in said passivation layer and above said third portion of said connecting portion.
